- ✓ **Just Released: ATEX LPG LoRaWAN Tank Monitor**

### TEKELEK PARTNERS WITH PAYGO ON SMART-TANK TECHNOLOGIES FOR INTELLIGENT MONITORING AND MANAGEMENT OF FUEL INVENTORIES AND PROCUREMENT

*New opportunities exist for both firms as IoT enables more informed, timely decision-making on when to purchase, hedge on industrial fuel.*

TORONTO, May 31, 2017 — Enterprise Ireland, the Irish government agency for

the promotion of international trade by Irish companies, today announced a partnership between electronic monitoring based Tekelek and fuel technology based Paygo for business development in their respective markets. The agreement, announced during an Enterprise Ireland

Trade Mission led by Minister Sean Canney TD, allows both organizations to capitalize on advances and economies in IoT technologies to provide greater intelligence on management and procurement of industrial fuels.

### New ChemSonic Tank Monitor

We are pleased to introduce the ChemSonic sensor as part of our local telemetry product offering. The ChemSonic sensor is specifically designed for chemical applications. The addition of the ChemSonic product compliments our established Eco-oil monitor and recently developed EcoWater monitor. For full details on the ChemSonic, please contact [sales@tekelek.ie](mailto:sales@tekelek.ie)

### ATEX LPG LoRaWAN Tank Monitor

Tekelek's IoT activity continues to grow as we proudly announces the addition of the ATEX LPG LoRaWAN Tank Monitor. Available from Q4, 2017, our [ATEX certified LPG Tank Sensor](#) is a flexible and configurable level sensor that interfaces with a Rochester Gauge. It communicates over a LoRaWAN network giving the customer the benefits of that technology such as low transaction cost and extended battery life.
